Dean@DeanOuellette.com

I grew up in New Hampshire and after spending some time in the Coast Guard followed by some school at University of New Hampshire I settled into a career of political consulting and campaign management. I would eventually take my career and my family to Pennsylvania before moving to Arizona and turning my career to real estate.

I am a USA Track and Field certified coach and love to spend my free time coaching and working with kids. With a busy career and five kids my free time is luxury which I am always striving to increase. I am always looking for ways to free up more time and streamline my processes so I can be involved with coaching kids.

I have a long-time passion for productivity systems and technology. I have learned how to use my iPad, my Android phone and my favorite app in the world Evernote to create a work management system that is portable, easy to use and very efficient.

I spend much of my time now working with agents at my brokerage Thompson's Realty as well as agents at other companies to teach them what I have learned and how they can implement Evernote into their business too.
